

Insulated Sectional Door

40mm & 70 mm panel thickness

Doors for cold-storage rooms

Insulated sectional door for loading docks with 40mm or 70mm panel thickness. Internal and external finish in white painted steel or a range of RAL colours.

The door is available in either manual or electric operation with a variety of opening functions.

Dimensions on request.

The doors can be manufactured with three different elevation types; standard lift, high lift or vertical lift. This enables the door to be adapted to any installation.
