

# WINDOWS

## Fixed & Sliding

Doors for working areas

With a frame detail to match our personnel doors, the fixed window is available with a choice of glazing options depending on the application.

The sliding window is popular as a document hatch for distribution centres or similar facilities.

In addition to the T5-treated anodised aluminium frame we can also offer the frame in white aluminium, stainless steel or your choice of RAL colour.

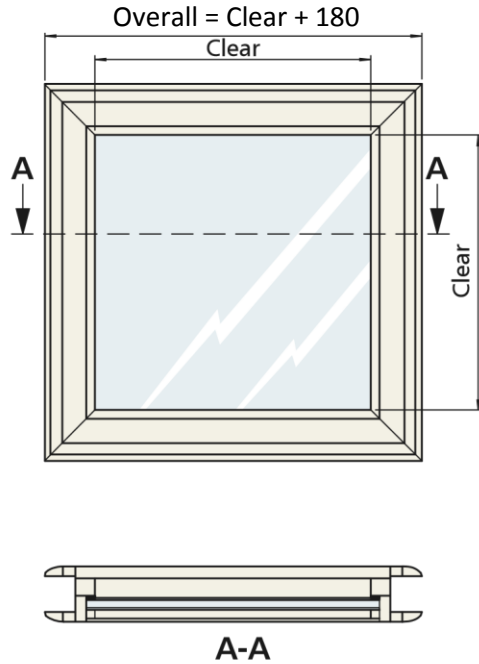

Single, double and triple glazing are all available with either 4mm metacrilate, 6mm laminated glass or 6mm toughened glass.

Safety film can be applied to one or both sides of the glazing units and heated glass is used for negative temperatures (with optional heat regulator).
