

CASE STUDY:

Fast-tracked door installation project

EUPHORIUM BAKERY, WEYBRIDGE

HISTORY

Opening of a new bakery in Surrey producing fresh bread and bakery products for a large supermarket chain.

PROJECT NOTES

This was a “quick turnaround” project with a very short lead-time from initial enquiry to completion. Regular site meetings with our client enabled us to successfully plan the door installations to ensure that the project was delivered on time.

TESTIMONIAL

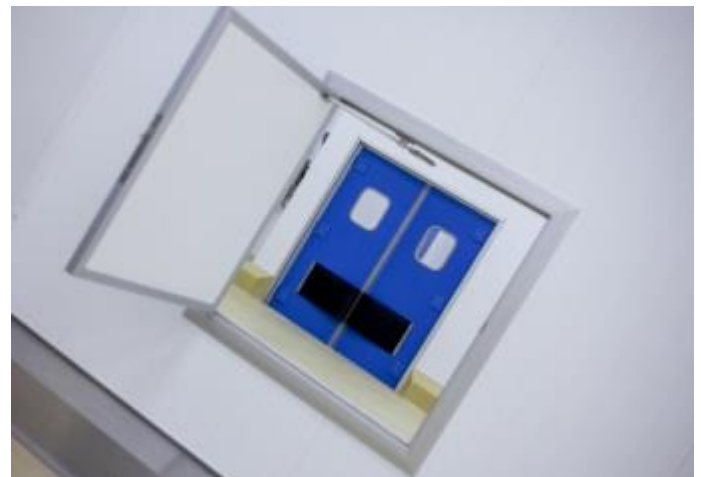

“Bluseal were the chosen supplier for a fast-tracked project to build a bakery. They were flexible in their approach, amending designs where required to suit the application. Their continued support, post the bakery opening, has been invaluable to ensure the product continues to deliver for the site.”

Kate Hancock, Project Engineering Manager
