

CASE STUDY:

Insulated & Industrial Door Project

GORDON'S FINE FOODS, CHANDLER'S FORD

HISTORY

New factory fit-out for leading manufacturer of premium condiments.

PROJECT NOTES

We were awarded a contract to supply 23 insulated doors to a leading insulation contractor. As part of our package we were also asked to install 7 new rapid rise doors and interlock one of them to an existing roller shutter door.

TESTIMONIAL

“We are delighted with the quality of the doors in our new premises. We only had 1 minor issue with a rapid rise door last month but Bluseal had an engineer on site within 4 hours to rectify this. These are the sort of response times we need in an operation like ours and we were impressed with the fast and professional manner this was dealt with.”

Andrew Gordon, Chairman
